ERP Solution Architect Program

Architect complete ERP solution landscapes across the enterprise.

Duration 120 Days · ₹3,00,000 + 18% GST · Certified ERP Solution Architect

www.pmtecherp.com

Live projects · Industry certification · 100% placement support · SAP-mapped curriculum

PROGRAM SUMMARY

Design full ERP solution landscapes across modules, integrations and Industry 4.0 — the architect's career track.

The ERP Solution Architect Program is a 120-day track for consultants who want to design solutions, not just configure modules. You'll learn to architect end-to-end ERP landscapes — module strategy, integrations, data architecture and Industry 4.0 connectivity.

Solution architects sit at the top of the delivery hierarchy, translating business strategy into technical design. This program builds the breadth, depth and design thinking that role demands.

120 Days

Duration

₹3,00,000

Program Fee

Level 5

Certification Level

₹18 - 35 LPA

Salary Range

WHO SHOULD ENROLL

- > Senior consultants moving into architecture
- > Implementation leads designing solutions
- > Technical-functional professionals
- > Those targeting principal or architect roles

WHAT YOU WILL LEARN

- > ERP solution architecture and landscape design
- > Integration architecture across systems
- > Data architecture, migration and governance
- > Industry 4.0, IoT and analytics integration
- > Solution estimation, proposals and design reviews

OUTCOMES

- > Design complete, integrated ERP solution landscapes
- > Architect integrations with external systems
- > Define data and governance architecture
- > Earn the Solution Architect certification

CAREER IMPACT

Opens senior, high-paying Solution Architect and Principal Consultant roles, and is the launchpad to Enterprise Architect leadership.

FREQUENTLY ASKED QUESTIONS

- **Who is the Solution Architect Program for?**

Experienced consultants and implementation leads who want to design ERP solutions across modules and integrations rather than configure a single area.

- **Does it cover Industry 4.0 and integrations?**

Yes — integration architecture, IoT/Industry 4.0 connectivity and analytics are core topics, reflecting how modern ERP landscapes are designed.
